English, Mandarin

Education

University of British Columbia, BC — Bachelor of Science

Expected NOV 2022

Majoring in Computer Science

PROJECTS

CPSC304 Project — Raincouver gym website

Displaying data in the database on webpages using Oracle and PHP.

I am mainly working on getting the member data from the database and displaying the data on the webpage, and updating the database for gym members. I also work on creating the main page and writing CSS codes for the website.

CPSC310 Project — Managing Data

I am mainly working on Managing/parsing the data in the Course and Room Directory given by Prof using javascript.

CPSC455 Project — meeting planner

This app is used to help people with busy calendars to schedule for group meetings.

My tasks:

1. Styling login/Signup pages.
2. Create forget password button
3. Create sendEmail function and Importing-ICS function.
